Groups with * in front of the name require a referral from Recovery Coach or BHMP. Groups with ** require referral from SACASA Advocate; call (520) 327-1171. Women's gender specific groups are for individuals who identify as female, and focus on female-specific issues.

Updated 10/11/19

GROUP DESCRIPTIONS

DEPRESSION & ANXIETY

Bipolar Skills Group: Managing symptoms and preventing complications begins with a thorough knowledge of your illness. Multi-approach group using CBT and DBT, this group addresses: Tracking bipolar mania and depression cycles; identifying triggers; coping with difficult or uncomfortable feelings; repairing your relationships; managing stress; regulating your mood; coping skills; and working through problems in the home.

HEALING TRAUMA

Seeking Safety (PTSD/Trauma): Designed for those just starting to work on their trauma. Learn to better understand symptoms related to PTSD and substance use. Free yourself from unhealthy patterns by learning safe coping skills. *Note: this is not a processing group; members do not share their personal trauma histories until later in treatment.*

EMDR Group: This closed PTSD group is for men and women with good coping skills who are clinically ready to process their trauma using Eye-Movement Desensitization and Reprocessing Treatment (EMDR). EMDR is an evidence-based practice for PTSD. The facilitator will screen for appropriateness and can answer any questions.

Dialectical Behavioral Therapy (DBT): Advanced coping group for those with borderline personality or those needing higher level skills. Topics include: mindfulness, emotion regulation, interpersonal skills, and distress tolerance. Group requires practicing skills outside of group to succeed (expect homework!).

Domestic Violence: This is a psycho-educational group facilitated by a therapist. This group focuses on the dynamics of domestic violence, systemic issues, raising awareness, learning alternatives to abusive behavior, changing our attitude toward all definitions of abuse, and the prevention of future violence. This group is open to both abusers and those who have been or are currently being abused. *This is not a certified DV course; check with probation/court orders prior to taking this group for legal purposes.

“I Thought It Was Just Me”: Shame and Trauma (Referral Only): This process group **for female-identifying individuals only** explores the work of Brene Brown and focuses on building self-love, belonging, resiliency and authenticity in recovery from PTSD. Questions that the group centers around include: What is shame? Can you recognize your shame triggers? What is shame resilience? Do you know the power of empathy? How do you want to be perceived? How do you cope? How do you disconnect from others? How can you reach out to people for help?

HEALTHY RELATIONSHIPS

Healthy Relationships: Provides education on a number of topics designed to improve communication and healthy boundaries. Members learn how to practice “clean communication,” break negative emotional and behavioral patterns, cope with anger in themselves and their partner(s), identify their family and social systems, and how to set and maintain healthy boundaries. These skills can be applied to intimate, familial and social relationships.

Anger Management: Understand where your anger comes from and learn tools and techniques to better manage anger, frustration and stress. (This group fulfills most DCS and other required treatment.)
