Treatment On Demand: Co-locating services improves access to care

Among the 48.7 million people aged 12+ who had a substance use disorder in the past year and were therefore classified as needing substance use treatment, **only 14.9% received substance use treatment during that time, and 85.1% did not.** [1]

Among the 6.1 million people aged 12 or older with a past year opioid use disorder, 18.3% (or 1.1 million people) received MAT in that time frame for their opioid use. [1]

Barriers reduce access to care.

Coordinated community collaboration intended to increase access to care can connect people with substance use disorders to appropriate, evidence-based treatment and services and, **ultimately, save lives and communities.**

Hub of Providers that Meet the Needs of Individuals 24/7/365

CODAC is co-located or collaborates closely with:

- HOSPITALS
- SUPPORTED LIVING
- LAW ENFORCEMENT, PIMA COUNTY COUNTY ADULT DETENTION CENTER, ARIZONA DEPARTMENT OF CORRECTIONS

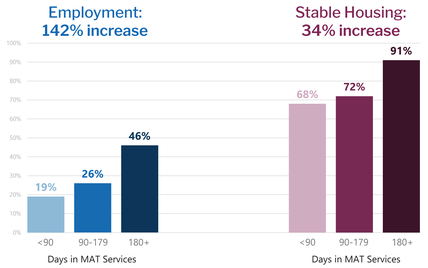
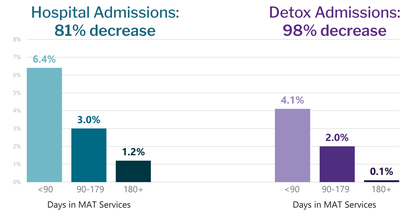
- Dominion Diagnostics (lab)
- UA College of Medicine Addiction Fellows
- Southwest Institute for Research on Women
- NAU School of Nursing

CODAC
HEALTH • RECOVERY • WELLNESS

Members who actively engage in MAT services benefit from improved outcomes such as **employment** and **stable housing**.



Members who actively engage in MAT services experience lower rates of **hospitalizations** and need for **detox services**.



In the past two years, CODAC's supported living programs for women and their children served 146 women, resulting in **74 successful discharges** and **preventing 56 removals** by the Department of Child Safety (DCS), allowing children to stay with their parents.

Individuals referred and/or enrolled through collaborations:

- Law Enforcement Deflections: 191 (FY22), 176 (FY23)
- Hospital NICU: 47 (FY22), 24 (FY23) referred
- Pima County Jail (started 9/23): 62 referred to date; 33 enrolled to date.
- STEPS Court: 67 (FY22), 64 (FY23) referred
